

iVario CONTROLLER

With more than 60 years of expertise in the field, you're guaranteed that the iVario generator has been built to go the distance to optimize the X-ray process. With the iVario Controller you are provided with an overall solution for a simplified and streamlined integration. With its industrial design it endures even in the most demanding environments serving without disruptions.

- The versatility that comes with the controller ensures simplified use. Many functions can be set either with the wheel or with the touchscreen making it easy and intuitive to use.
- The power curves of the tubes are visualized in the software, making it easy to follow the process.
- Possibility to define and store recipes
- The fully configurable iVario Controller can be set depending on the needs (color of the lights, emergency stop).
- up to 100m cable allowing for flexibility in integration
- multiple user schemas can be defined and stored
- The controller is highly versatile since the same intuitive software is used for computer and controller
- 19" rack compatibility allows for easy retrofit of XRP
- multilanguage operation

CONTROLLER

OVERALL SOLUTION FOR INTEGRATION
